LATIMER ANNOUNCES FREE FLU VACCINES THIS MONTH

Health Commissioner Urges All Residents to Schedule A Flu Shot

(White Plains, NY) – With peak flu season at the height of activity, County Executive George Latimer announced that the County Health Department will offer more free flu vaccines for residents by appointment on Tuesday, January 14 and Tuesday, January 21 at the County Clinic in White Plains.

Latimer said: “The flu is widespread this season, and it can be miserable if you come down with the virus. I encourage anyone who did not have a flu vaccine this fall to sign up for one today, to protect you and those around you well into 2020.”

The New York State Department of Health has reported a sharp increase in the number of laboratory-confirmed influenza cases and hospitalizations reported statewide. So far this season in New York, 3,592 flu-related hospitalizations and one flu-associated pediatric death have been reported.

Westchester flu clinics are open to all, especially those without insurance or whose insurance doesn't cover vaccines. Register online for a free flu vaccine at www.health.ny.gov/gotoclinic/60. The vaccines will be given at the County Clinic, 134 Court St., White Plains, as follows:

- Tuesday, Jan. 14, 9 a.m. to 4 p.m.
- Tuesday, Jan. 21, 11 a.m. to 6 p.m.

The County Health Department has focused its public vaccination efforts on people who lack the means to get vaccinated elsewhere by bringing flu shots to homeless shelters, soup kitchens and food pantries throughout Westchester.

Health Commissioner Sherlita Amler, MD, said: “Everyone six months and older should get a flu shot each year. Flu can be deadly, and the flu vaccine is very safe and the best protection we have. By getting an annual

flu shot, you help protect infants too young to be vaccinated, seniors and people with chronic health conditions, who are more vulnerable to flu complications.”

Flu activity usually peaks between December and February, but can last into May. One flu vaccine now provides protection all season long and can prevent illness or reduce the severity of flu symptoms. The vaccine becomes fully effective after about two weeks.

Dr. Amler said that anyone who does get a respiratory infection should cough or sneeze into their elbow, wash their hands frequently with soap and water, stay home until 24 hours after their fever subsides to avoid spreading germs, clean surfaces they touch frequently, such as doorknobs, water faucets, refrigerator handles and telephones, and get plenty of rest.

About Westchester County

Westchester County, located in the heart of the historic Hudson Valley, covers 500 square miles and has a population of just under a million. Originally home to Native Americans, who were members of the Lenape tribe, it is today a rich mix of many cultures and landscapes. The County is a blend of bustling cities, quaint villages and picturesque towns as well as open spaces and a network of beautiful parks. Westchester is made up of 6 cities, 19 towns and 20 villages. Westchester County is known for top-notch public schools, and a high quality of life. The County is also an intellectual capital, boasting a highly educated workforce, competitive colleges and universities, Fortune 500 companies, world changing non-profits, and cutting-edge research centers. Westchester is led by County Executive George Latimer, who took office in January 2018 as the ninth County Executive. Using inclusion and openness as a foreground, Latimer is fighting to make Westchester a destination for all people to live, work and enjoy.
