Re: Westchester County Department of Health Back-to-School Immunization Clinics

Summer is a great time for families to ensure their school-age children are up-to-date on vaccines required for the next school year. Westchester County Department of Health encourages parents and guardians to speak with their health care providers to see what, if any, vaccines are needed. For students who are unable to receive vaccines from their healthcare provider, the Westchester County Department of Health may be able to offer vaccines. Parents should call the Department at 995-5800 to see if their student is eligible and to schedule an appointment at one of our convenient immunization clinics in White Plains or Yonkers.

Please distribute the enclosed flyer to your community, post it on your website and in your schools and share through your email blasts, as a backpack stuffer, in newsletters and with parent-teacher organizations.

For more health information, please Like us on Facebook @whealthdept, follow us on Twitter @whealthdept and visit our website at www.westchestergov.com/health.

Thank you for your help in distributing this important information to families. I wish you a wonderful summer and a healthy school year.

Sincerely,

Sherlita Amler, M.D.
