Westchester County Public School BMI Report 2010-2011 to 2018-2019 School Years

In this issue:

- Historical Trend of BMI Status (All Schools)
- Distributions of Schools by Percent of overweight and/or obese
 - Historical Trend
 - 2017-2019 School Years
- Historical Trend of Individual School BMI Status
- Data

Prepared by WCDH
Planning & Evaluation

Project Staff:
Bryan Schaub
Medical Data Analyst

Director:
Jiali Li, Ph.D.
Director of Research &
Evaluation

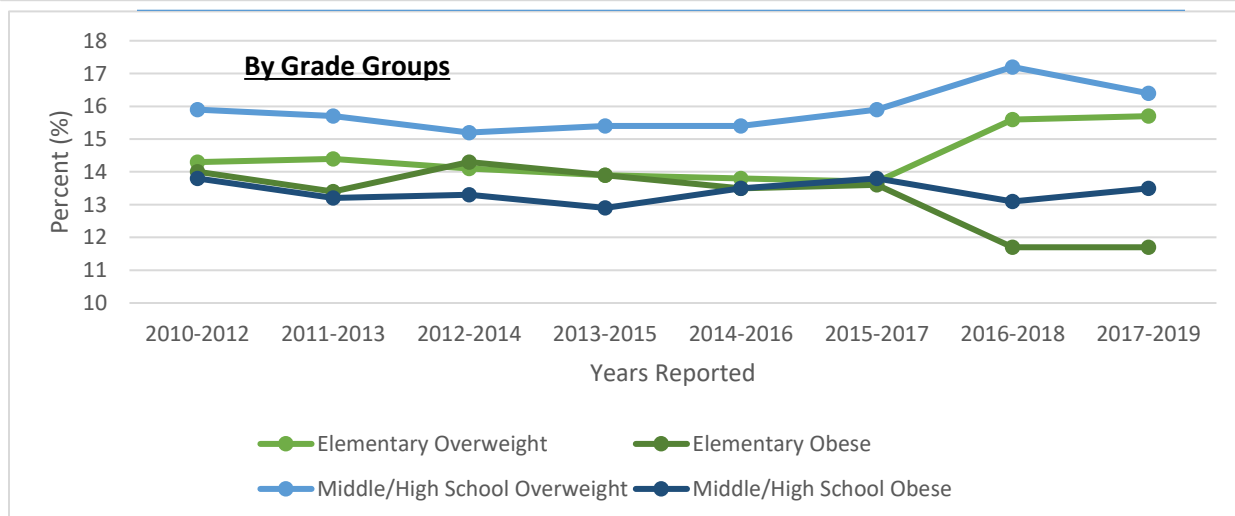

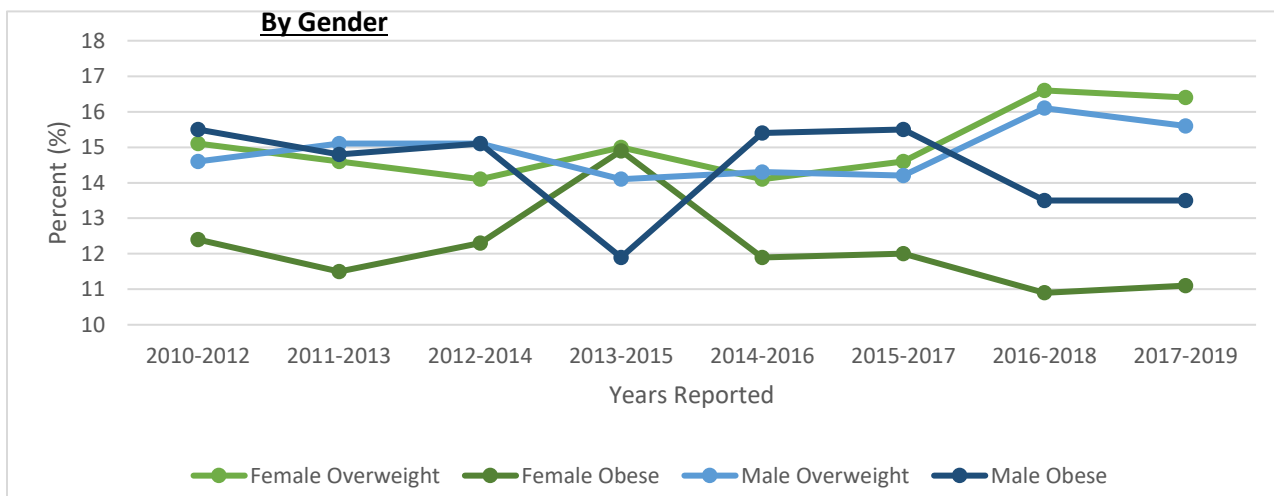

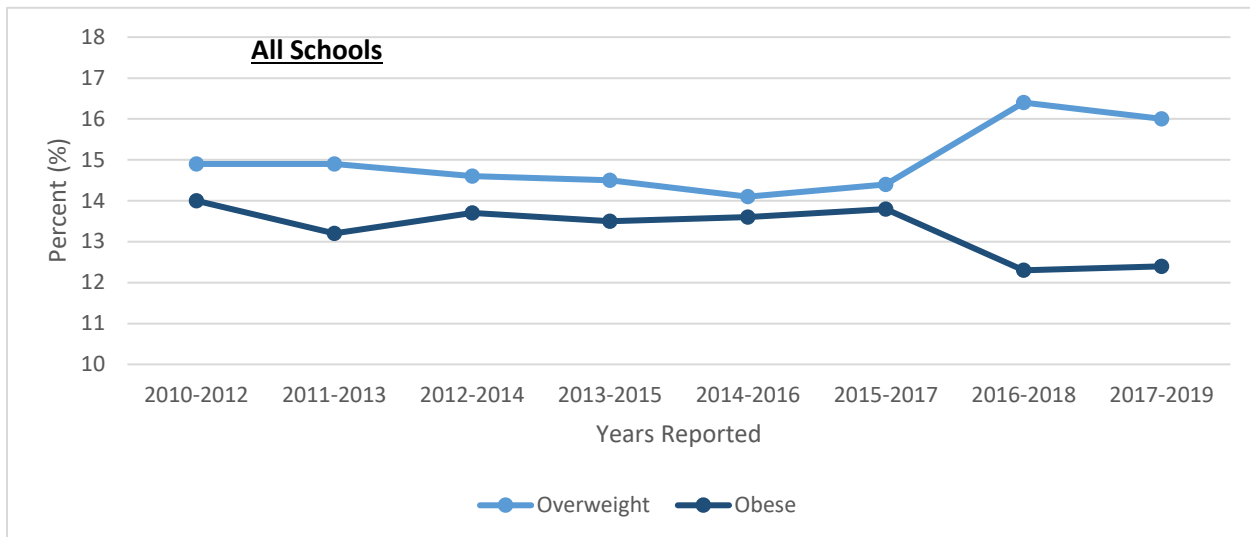

Data included in this report are from the Student Weight Status Category Reporting System (SWSCR) of the New York State Department of Health (NYSDOH). The SWSCR collects weight status category data, namely, underweight, health weight, overweight, or obese, based on BMI-for-age percentile on children attending New York State public schools. The dataset includes separate estimates of the percent of students who are overweight, obese and overweight, or obese for all reportable grades by grade groups (elementary and middle/high). The rates of overweight and obesity reported are percentages based on counts of students in selected grades (**Pre-K, K, 2, 4, 7, 10**) reported to the NYSDOH. Each public school is required to submit this information every two years, with 50% of the schools does one year and the remaining 50% does the following year. Therefore, it takes two years to collect a full cycle of data for all eligible school districts in the state.

Beginning in 2019, the grades required to report weight status are changed to **Pre-K, K, 1, 3, 5, 7, 9, and 11**. Therefore results from the 2019-2020 school year cannot be compared with previous school years because of changes in methodology and grades levels. Such information will be reported in separate data briefs.

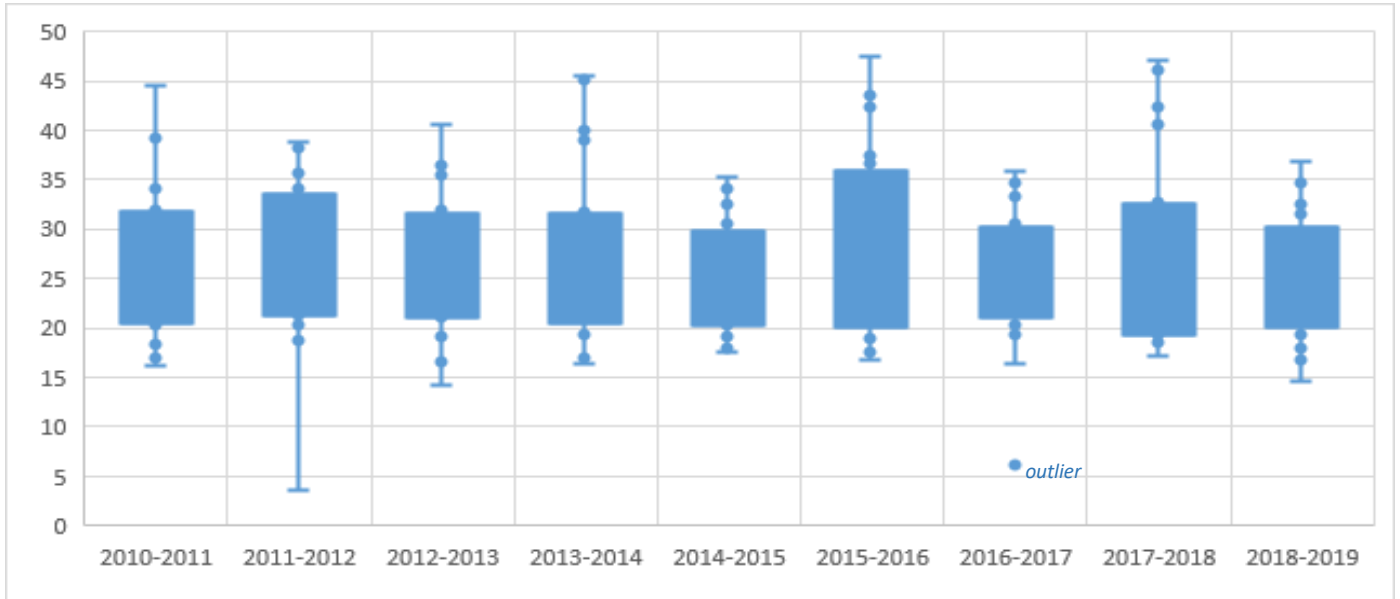

George Latimer, County Executive
Sherlita Amler, MD, Commissioner
Department of Health

Historical Trend of BMI Status, All Schools, 2010-2012 to 2017-2019 School Years

Distribution of Schools by Percent of Overweight or Obese among All Students, 2010-2012 to 2017-2019 School Years

The percent of students who were overweight or obese in each school district over time is presented in the above graph. The boxes mean 50% of the schools had their BMI percent fell into that range. The lines above or below the box present the upper or lower quartiles, meaning 25% of the schools had their BMI percent fell either above or below the box.

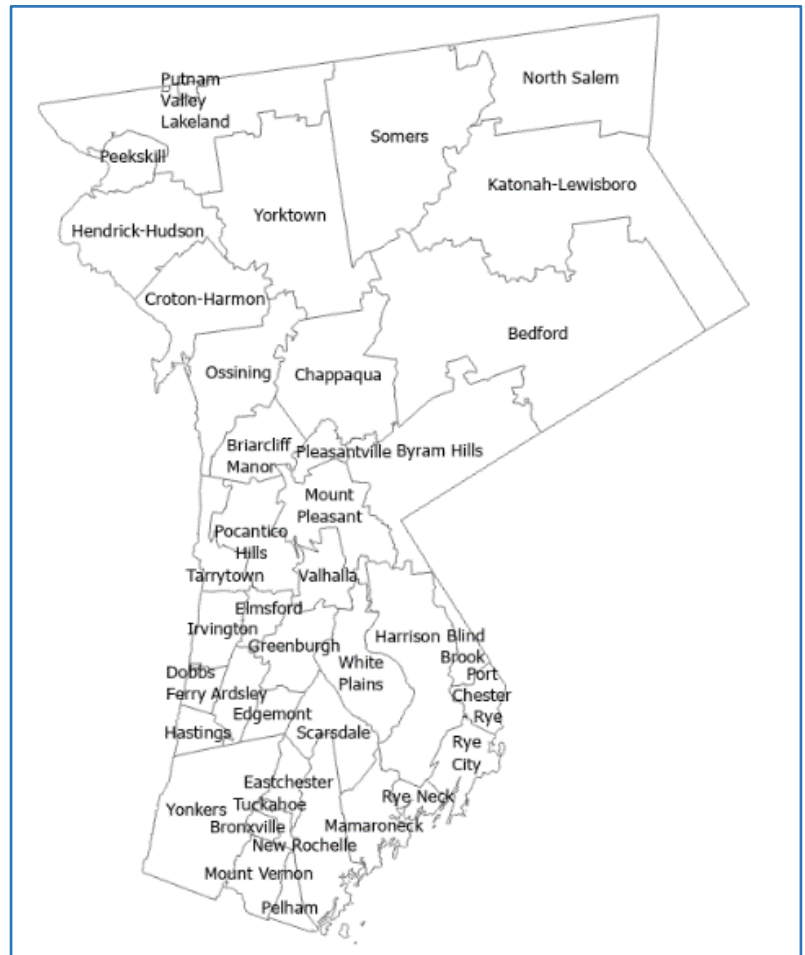

The historical trend of BMI status of each individual school is presented starting on page 7 (please note that scales of these graphs vary based on the data range of the BMI data points. The detailed data are presented in the “Data” section.

- 37 VALHALLA UNION FREE SCHOOL DISTRICT
- 38 WHITE PLAINS CITY SCHOOL DISTRICT
- 39 YONKERS CITY SCHOOL DISTRICT
- 40 YORKTOWN CENTRAL SCHOOL DISTRICT

School districts are geographic entities and single-purpose governmental units that operate schools and provide public educational services at the local level. The national Center for Education Statistics collaborates with the U.S. Census Bureau to annually update school district boundaries, names, grade ranges, etc. based on information provided by state educational officials. In Westchester County, the school district boundaries do not follow the municipality boundaries.

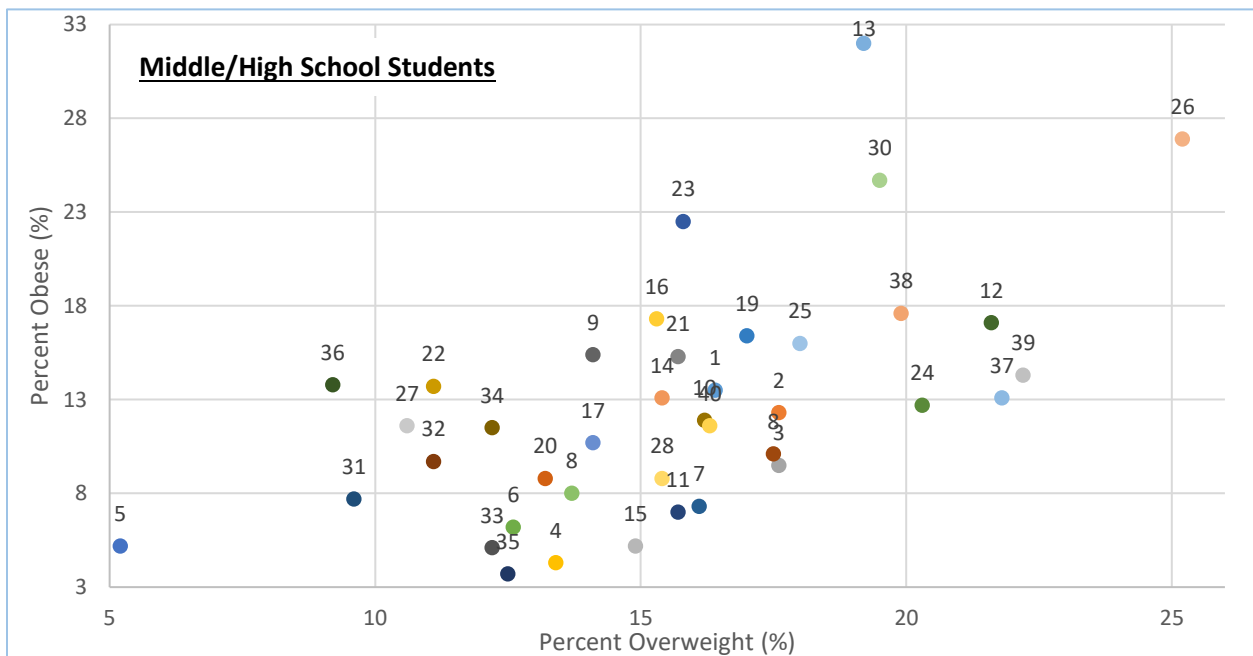

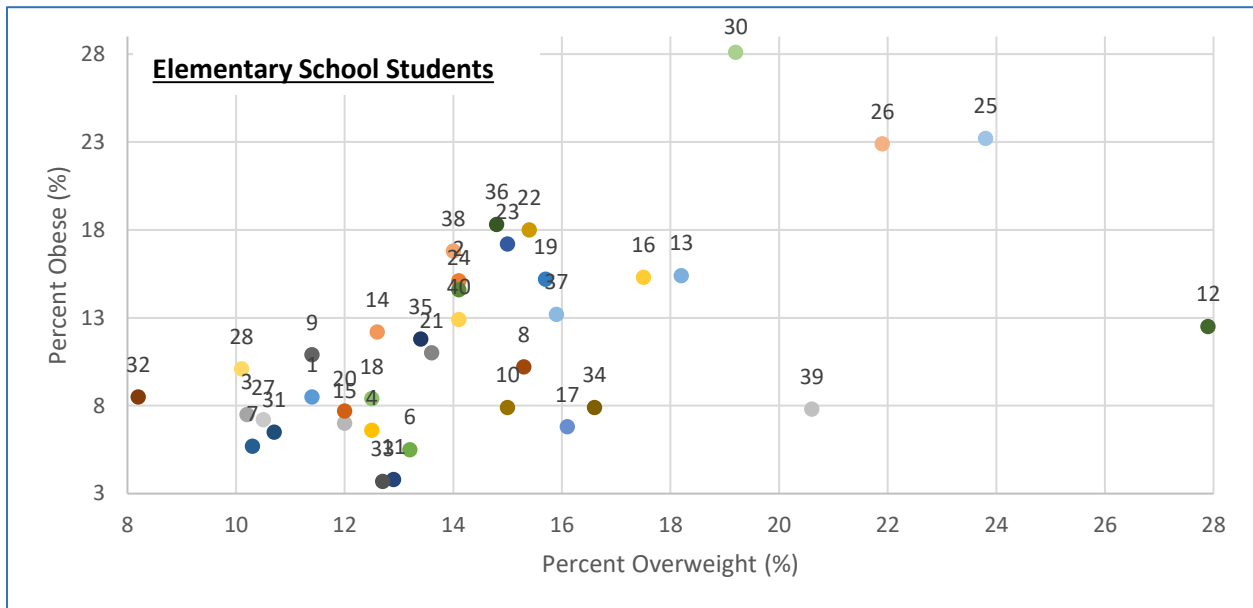

This list includes 40 school districts that provided BMI data to NYSDOH during the study period of this report. The numerical numbers are used as school labels in the next five graphs.

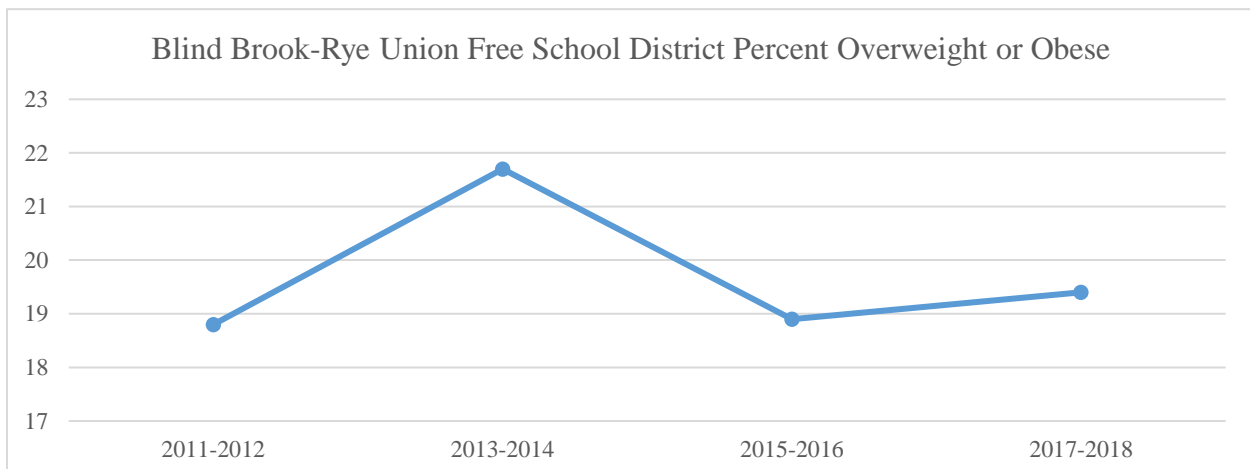

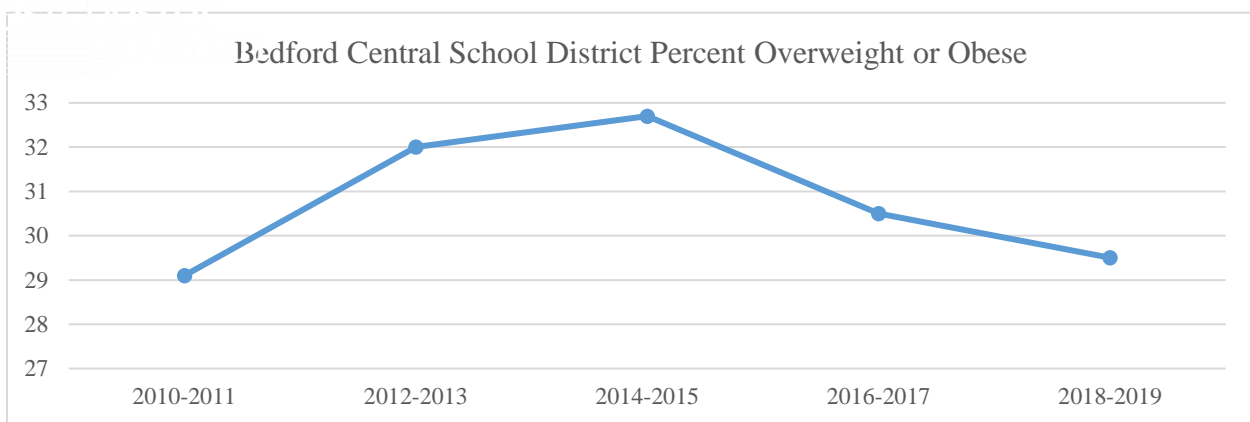

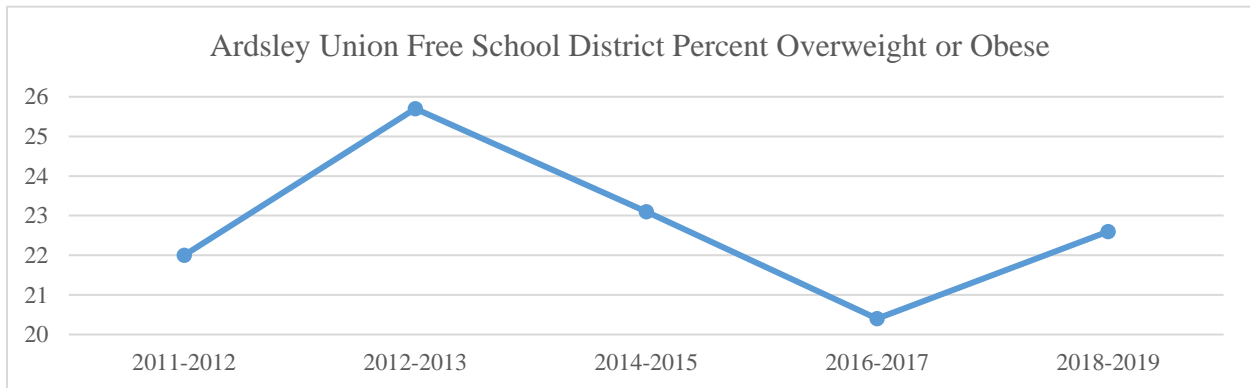

Distribution of Schools by Percent of Overweight and Percent of Obese, 2017-2019 School Years

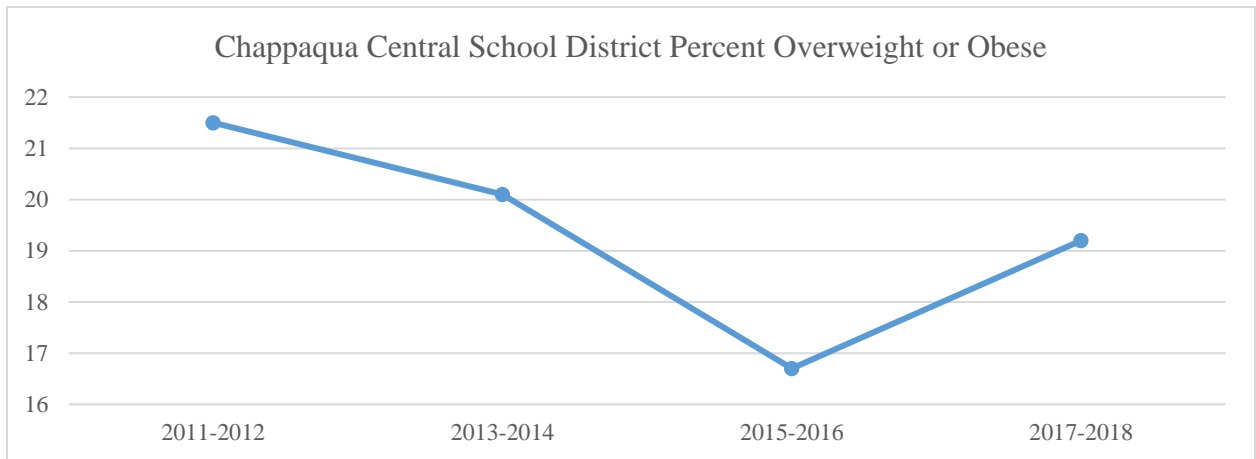

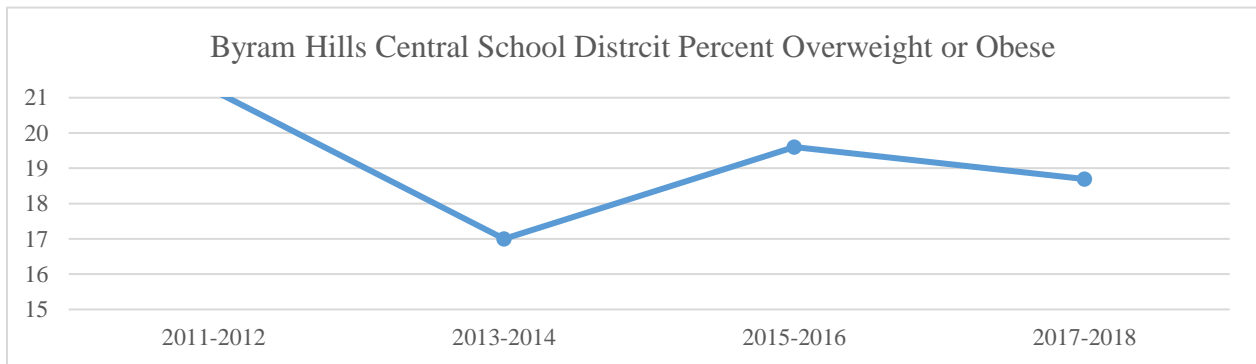

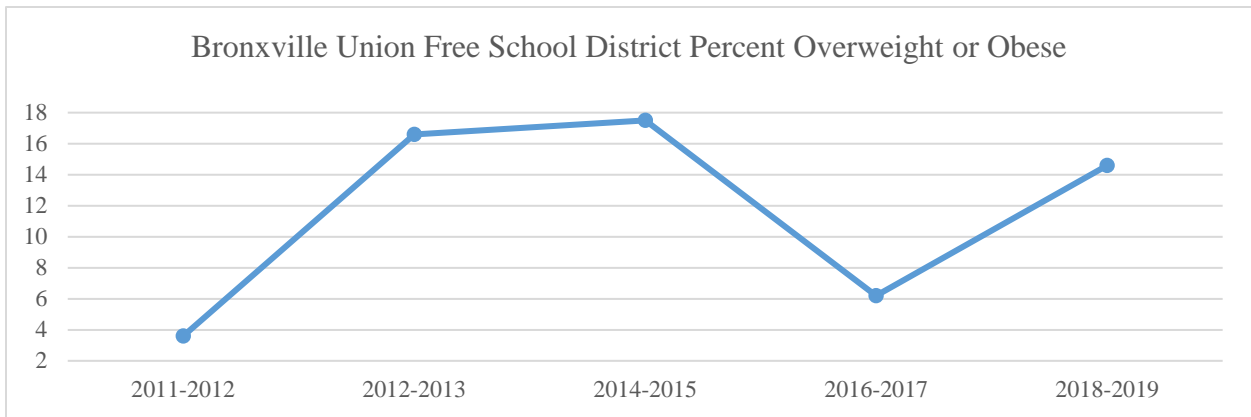

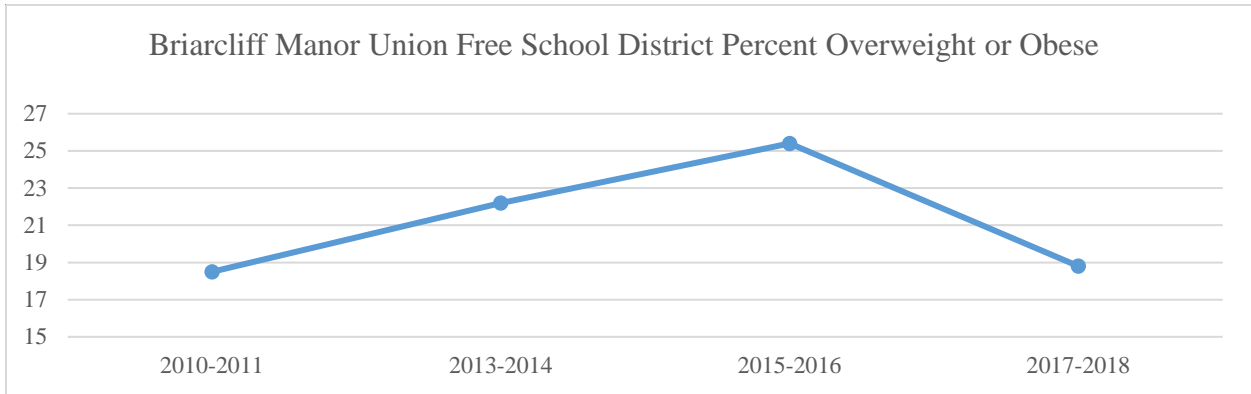

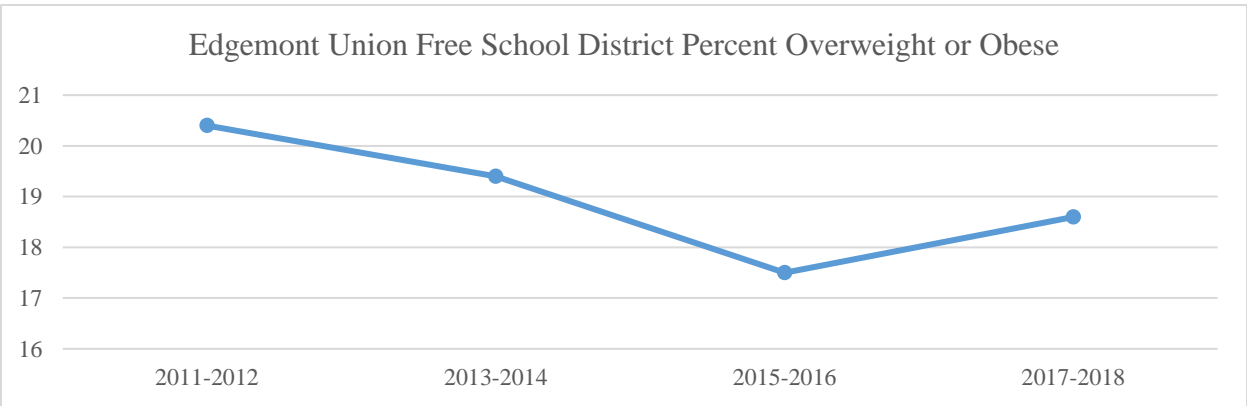

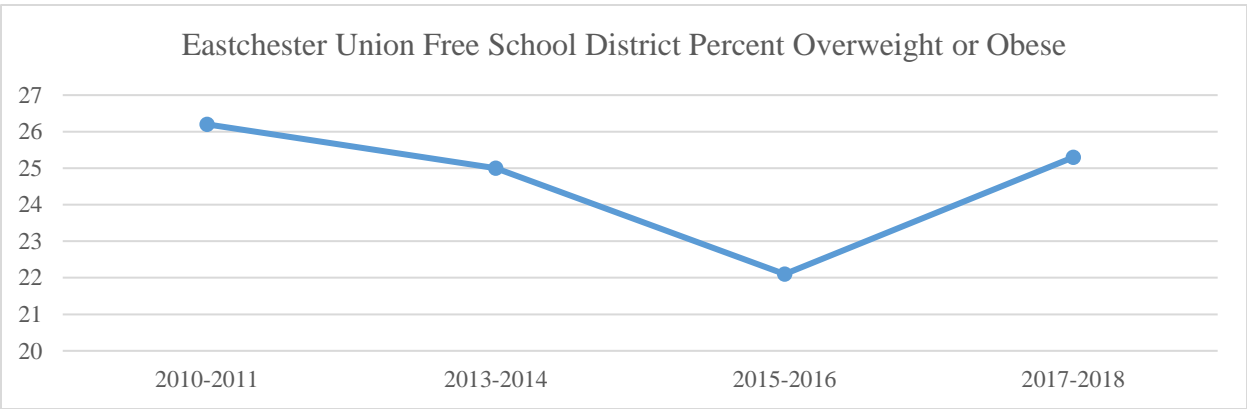

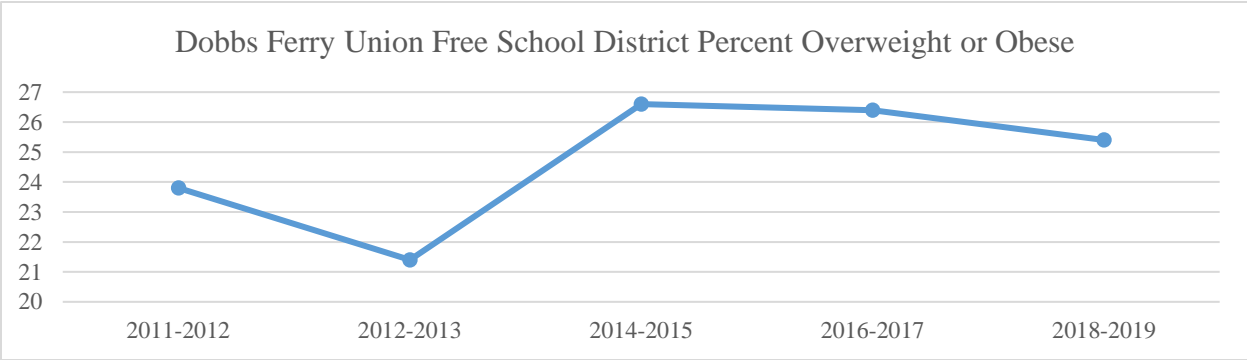

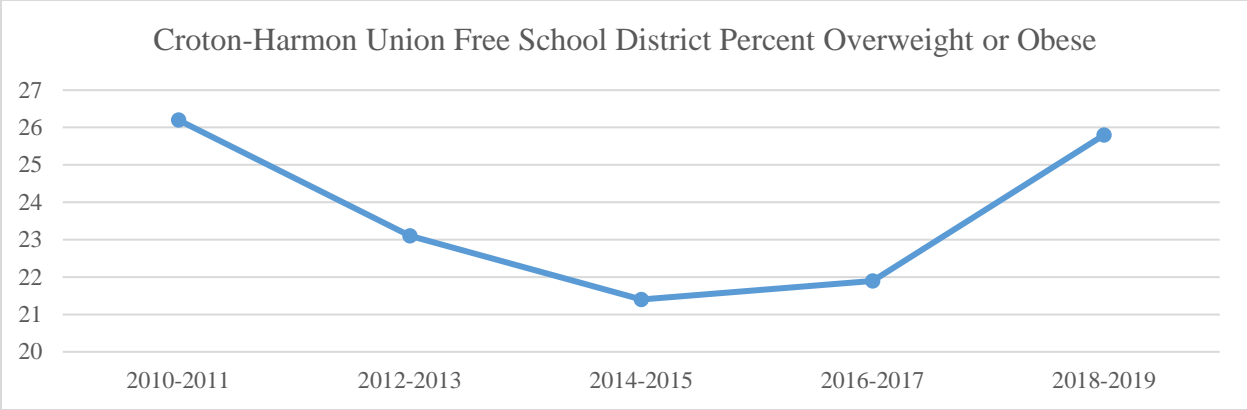

Distribution of Schools by Percent of Overweight and Percent of Obese, 2017-2019 School Years
