

LEAD-SAFE SHOPPING LIST

- NIOSH-certified disposable respirator with a HEPA (High Efficiency Particulate Air) filter (N-100, R-100, or P-100).
- HEPA vacuum cleaner. Regular household vacuums not equipped with a HEPA filter can spread harmful lead dust into the air and the surrounding area.
- Wet sanding equipment (e.g., spray mister, wet-dry sandpaper and sanding sponges)
- Two buckets and an all-purpose cleaner. Use one bucket for the cleaning solution and the other for rinsing. Change the rinse water frequently and replace rags, sponges and mops often.
- Heavy-duty plastic sheeting and heavy-duty plastic bags.
- Tape to completely seal the plastic sheeting in place.
- Protective clothing. To keep lead dust from being tracked throughout your home, wear clothes such as coveralls, shoe covers, hats, goggles, face shields and gloves and launder non-disposable work clothes separately.
